

WONDER WELLNESS

GENERAL CONTRACTOR FOR LUXURY POOLS, SPA, WELLNESS & RESORT PROJECTS

Wellness,
beautifully built.

COMPANY PROFILE

DESIGN / CONSTRUCTION / MEP / FINISHES / TESTING / MAINTENANCE

01 / COMPANY

One vision. Every detail.

LUXURY WELLNESS ENVIRONMENTS

Pools, spas, technical systems and integrated hospitality projects

“Luxury wellness requires more than aesthetics: it requires technical excellence.”

Wonder Wellness Srl is an Italian company specialized in the design, construction, supply and maintenance of high-end swimming pools, spas, wellness areas and technical systems for private residences, hotels, resorts and hospitality properties.

Operating as a specialized General Contractor, Wonder Wellness provides integrated turnkey solutions, coordinating design, construction works, MEP systems, finishes, equipment, testing and after-sales maintenance through a single point of contact.

Clients benefit from streamlined communication, centralized project management and clear technical coordination throughout every phase of the project - from the first idea to final delivery and long-term maintenance.

02 / APPROACH

General Contractor.

A single point of contact for the entire project

Being a General Contractor means taking responsibility for the overall coordination of the project, integrating different skills within a single technical, aesthetic and functional vision.

Wonder Wellness can follow the entire construction process, coordinating the specialized parties involved and ensuring continuity between design, construction works, technical systems, supplies, finishes, testing and maintenance.

The client has a single point of contact, better schedule control, more orderly site management and greater clarity on operational responsibilities. The goal is to provide complete project management, avoiding fragmentation, overlaps, coordination issues and delays caused by too many parties working without proper integration.

03 / ORGANIZATION

An integrated structure.

SPECIALIZED NETWORK

Wonder Wellness coordinates a network of specialized contractors, technicians, craftsmen, installers, suppliers and professional partners. Each project requires different skills. For this reason, Wonder Wellness selects and coordinates the most suitable professionals according to the type of project, while maintaining overall control of quality, timing and technical consistency. Wonder Wellness does not simply bring together suppliers: it coordinates them within a single project, with a shared objective and central technical management.

OUR IDENTITY

Wonder Wellness is not just a swimming pool or spa company. It is a technical and design structure capable of integrating construction, MEP systems, architecture, technology, furniture, comfort and maintenance. We work in complex environments where water, air, heat, materials, energy and design must work together seamlessly. Our mission is to transform an idea into a complete, functional, elegant, safe and maintainable wellness environment over time.

01 SPECIALIZED PEOPLE

02 ONE SHARED VISION

04 / SCALE

Built for ambitious places.

LARGE-SCALE SYSTEMS, RESORTS, LAGOONS AND WATER FEATURES

Wonder Wellness develops complete solutions for large-scale projects aimed at hotels, resorts, tourist complexes, hospitality properties and integrated wellness areas.

In these contexts, the role of General Contractor becomes fundamental, because technical complexity requires coordination, control and the ability to integrate many different processes.

Each large-scale project is assessed in terms of guest capacity, safety, water quality, air quality, energy consumption, operational efficiency, maintenance requirements, aesthetic impact and long-term sustainability.

WONDER WELLNESS / EXPERIENCE

A five-star wellness experience.

Design, technology and wellness come together to create exclusive, memorable and truly integrated environments.

05 / ENVIRONMENTS

Beyond the pool.

SPA, BEAUTY, FITNESS AND FURNISHINGS

Wonder Wellness complements its projects with the supply of equipment, furnishings and professional accessories.

This allows the client to rely on a single General Contractor not only for construction and technical systems, but also for the final fit-out of the spaces.

06 / ENGINEERING

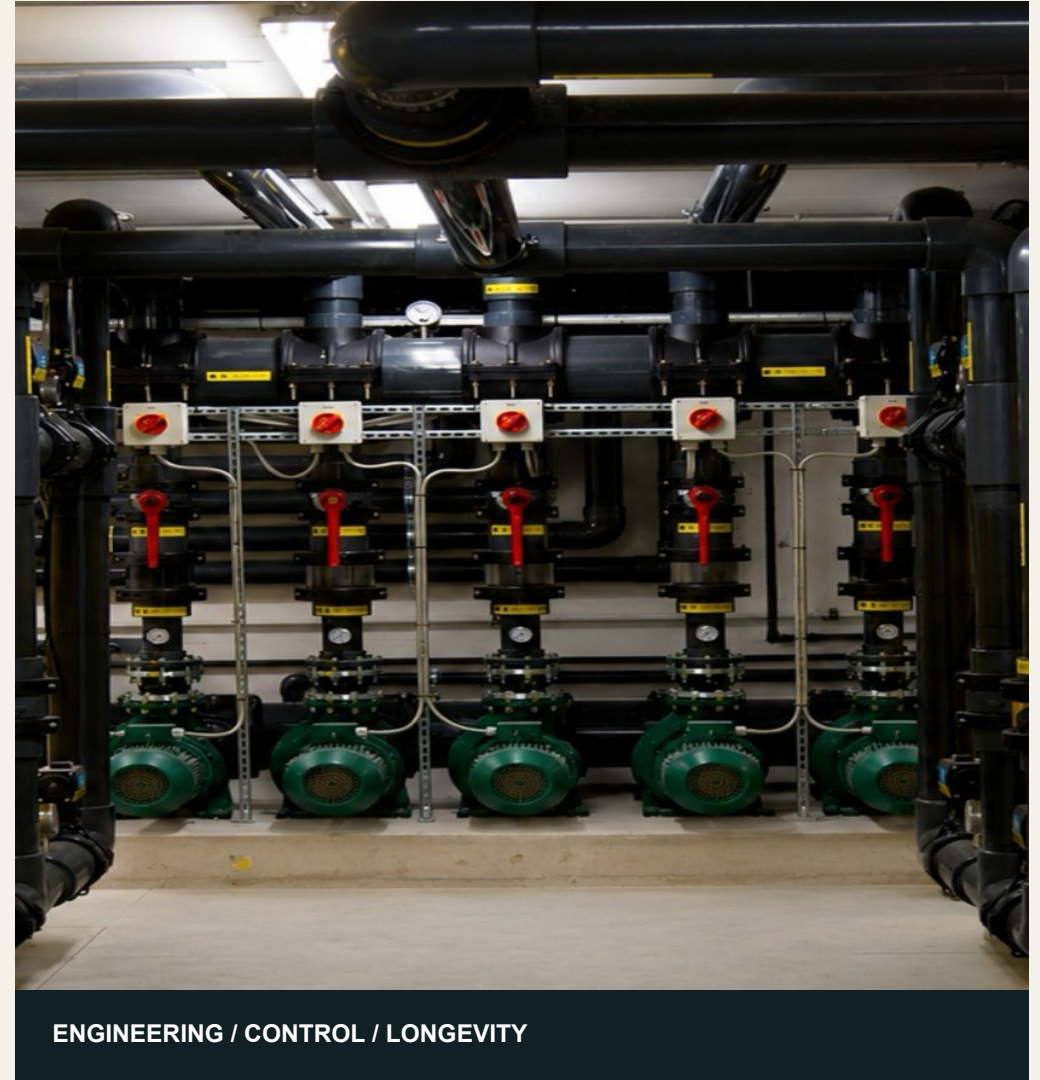

Technology beneath the experience.

TECHNOLOGICAL SYSTEMS

Engineering systems represent the technical core of every swimming pool, spa and wellness environment.

For this reason, Wonder Wellness pays particular attention to the sizing, selection, integration and coordination of technical systems.

Each system is designed and coordinated to ensure functionality, efficiency, safety and ease of management.

ENGINEERING / CONTROL / LONGEVITY

07 / PROCESS

The Wonder Wellness method.

08 / THE METHOD IN ACTION

WonderFlow. Work made visible.

WonderFlow is the Wonder Wellness way of organizing and documenting every project: a shared record of what happens on site, day by day.

01

DOCUMENT

Daily reports, photographs, technical drawings and progress updates record who did what, where and when.

02

COORDINATE

Contractors and suppliers can see what is ready and plan their next activity with fewer gaps and unnecessary calls.

03

CARE OVER TIME

The client can follow progress remotely and receive a structured record that supports precise future maintenance.

From construction to handover, every detail remains available for the people who build, manage and live the project.

09 / THE VALUE

Why Wonder Wellness.

General Contractor

Complete and unified management from design to maintenance.

Single Point of Contact

One reliable point of contact for design, construction, supplies, systems, finishes, testing and support.

Specialized Network

Each process is entrusted to competent professionals coordinated by central technical management.

Wellness Expertise

Swimming pools, spas, steam baths, saunas, water treatment and wellness environments are our core expertise.

Turnkey Solutions

From the first idea to final delivery, Wonder Wellness can manage the entire project.

Integrated Technical Skills

Construction, technical systems, water, air, energy, automation, furnishings and finishes are coordinated within a single project.

Aesthetic and Functional Quality

Every environment must be beautiful, efficient, comfortable, safe and easy to manage.

Technology and Innovation

Advanced systems for remote control, home automation, water treatment, air treatment and energy management.

Maintenance and Continuity

We support the client after delivery, providing assistance, inspections and technical support.

10 / POSITIONING

More than a place. A lasting experience.

Wonder Wellness works with hospitality properties, private clients, designers, architects, hotels, resorts and investors who want to create high-end wellness environments.

Our main value lies in our ability to act as a wellness-specialized General Contractor, integrating technical expertise, specialized contractors, professional supplies and maintenance within a single coordinated management structure.

We do not simply build swimming pools or spas: we create environments, experiences and systems designed to enhance properties, support hospitality businesses and last over time.

“Integrated wellness environments engineered for luxury hospitality and private excellence.”
